DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashby EP 0809969, cited by applicant.

Ashby discloses a ligament-tensioning device for preparing for implantation of a joint implant comprising a base body, e.g. 1, a first claw, e.g. 2, with a distal bearing surface, e.g. 3, and a second claw, e.g. 5, with a proximal bearing surface, e.g. 6, wherein the second claw is displaceable parallel to the first claw, cutting jig, e.g. 27, having a U-shaped projections with slots, e.g. 31, wherein the projections can be placed on mounts, e.g. 32, of the base body, a locking element and catches (see page 4, column 2, lines 6-19), a first scale, e.g. 11, a second scale, e.g. 33, a cylindrical guide, e.g. 28, an alignment guide (see figure 4), a drill guide, e.g. 60, wherein the cutting jig has a saw guide, e.g. 65, via the drill guide, wherein the drilling jig can be placed onto the mounts of the base body via the cutting jig (see page 5, column 1, line 50-column 2, line 1), and a force indicator (see page 4, column 1, lines 28-42). The device of Ashby performs the method of preparing a joint for the implantation of a joint implant as disclosed in claims 20-24.

With regard to the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Ashby, which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for art cited of interest.
